# Momentum in Market Data

Narasiman Jegadeesh  
Emory University

Sheridan Titman  
U. of Texas, Austin

**Seminal Academic Paper:**

**“Returns to Buying Winners and Selling Losers:  
Implications for Stock Market Efficiency”  
(1993)**

# Profitability of Momentum Strategies: An Evaluation of Alternative Explanations

By Narasiman Jegadeesh and Sheridan Titman (2001)

Following Jegadeesh and Titman (1993), at the end of each month we rank the stocks in our sample based on their past six-month returns (Month -5 to Month 0) and then group the stocks into 10 equally weighted portfolios based on these ranks. Each portfolio is held for six months (Month 1 to Month 6) following the ranking month.

**Table I**  
**Momentum Portfolio Returns**

This table reports the monthly returns for momentum portfolios formed based on past six-month returns and held for six months.

	All Stocks		
	1965-1998	1965-1989	1990-1998
P1 (Past winners)	1.65	1.63	1.69
P2	1.39	1.41	1.32
P3	1.28	1.30	1.21
P4	1.19	1.21	1.13
P5	1.17	1.18	1.12
P6	1.13	1.15	1.09
P7	1.11	1.12	1.09
P8	1.05	1.05	1.03
P9	0.90	0.94	0.77
P10 (Past losers)	0.42	0.46	0.30

1.65% / mo. = 21.7% / yr

16.8% Diff.

0.40% / mo. = 4.9% / yr

# StormGuard-Armor

## Detect the Onset of Bear Markets

**StormGuard - Armor**  
 Incorporating Price, Highs/Lows and Volume Data  
 Utilizing Matched Filter Theory, PID Algorithms & Fuzzy Logic

Introduced  
 March 2016

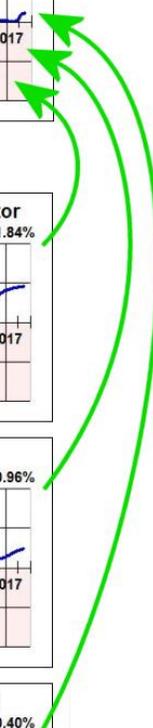

1. Price Trend

2. Value Sentiment

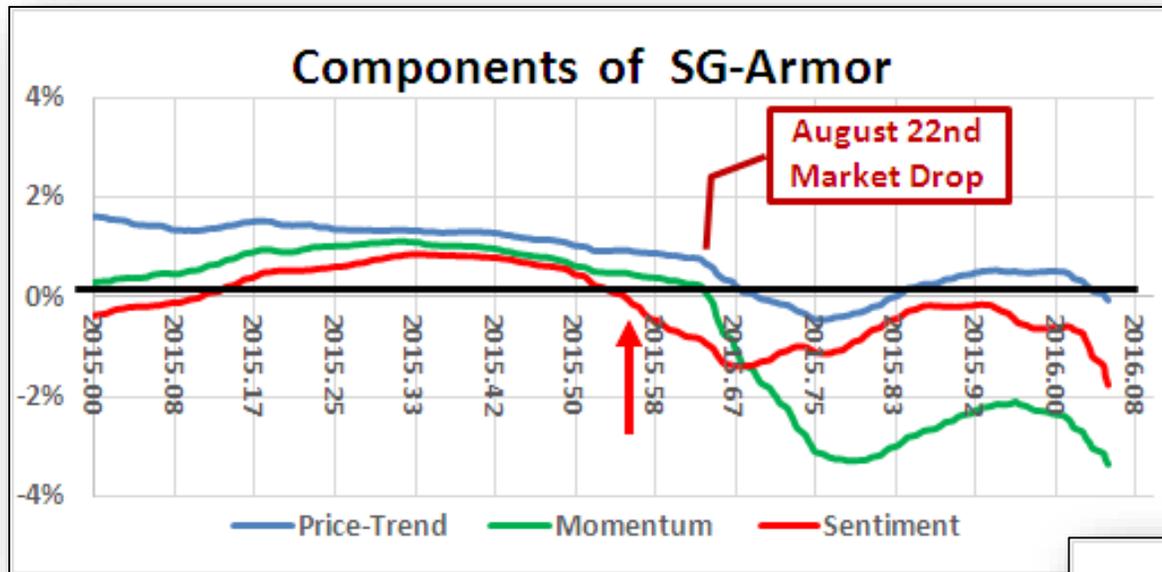

3. Institutional Volume

StormGuard-Armor Improves Entry and Exit  
 by Analyzing Three Different Market Views:  
 Price Trend – Value Sentiment – Market Volume

	S&P-DA	SG-Std	SG-Armor
Ann. Return	9.9%	11.2%	13.3%
Std. Deviation	16.9%	12.3%	10.4%
Sharpe Ratio	0.58	0.91	1.28
Time In Market	100%	83%	73%
Avg. Trades/Year	0.00	0.58	1.57

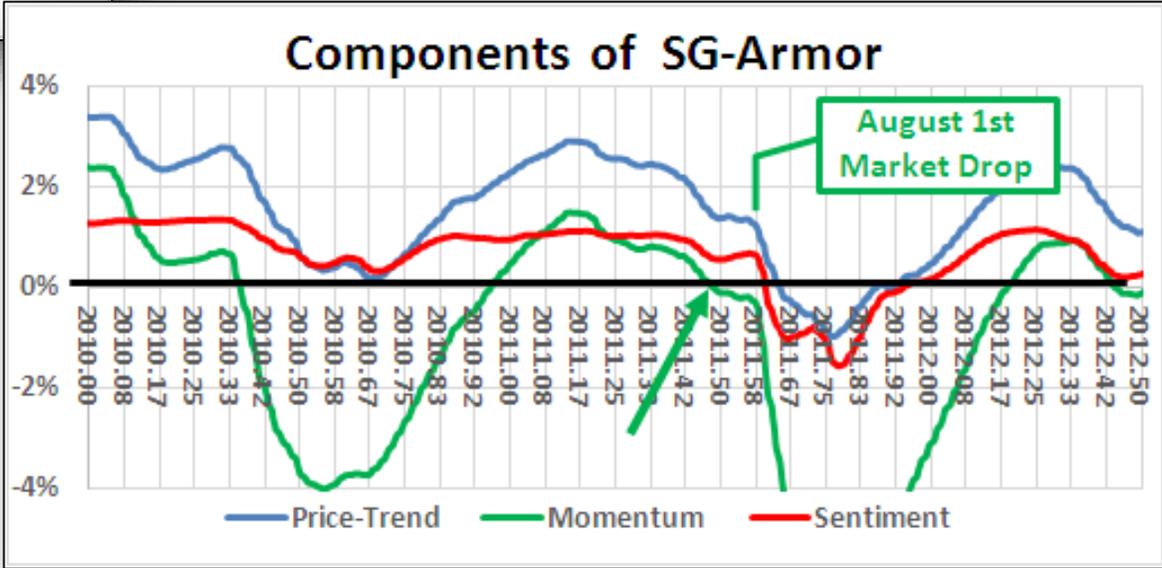

# Why is StormGuard-Armor Better?

It Analyses Three Different Kinds of Market Behavior.

It Incorporates Event Detection, not Simply Timing Adjustments.

# How SumGrowth Uses AI

To Perceive the environment and take action to maximize success.

**FWPT: Forward Walk  
Progressive Tuning**

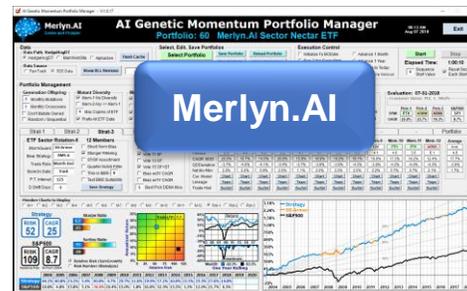

Adaptively changing the algorithm based on the past character of the data. Walks through out-of-sample data for its buy/sell decisions.

**StormGuard - Armor**

Employs Fuzzy Logic to evaluate a composite of 12 measures of the market's character to determine current investment safety.

**FWPP: Forward Walk  
Progressive Picking**

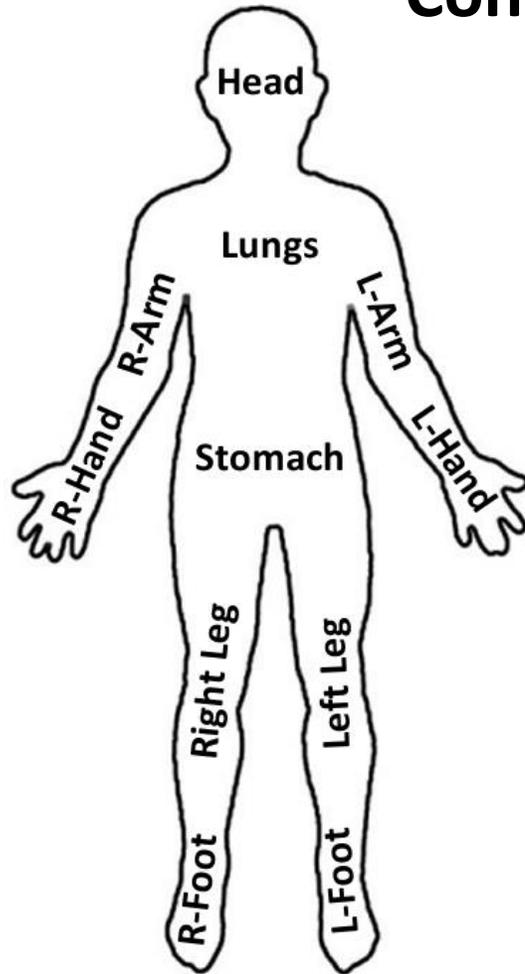

Uses a Genetic Algorithm to evolve the candidate funds in a population of momentum strategies to eradicate remnants of hindsight selection bias.
